How to use stripe

1. https://stripe.com/en-my

2.After done register You will see this page

Go open 测试模式 and click 开发人员

Then click on webhook

Click 添加本地监听器

侦听 Stripe 事件

添加端点 在本地环境中测试

用 Stripe CLI 在您的本地环境中模拟 Stripe 事件，或了解更多关于 Webhook 的信息。

❶ 下载 CLI，并用您的 Stripe 账户登录

```
$ stripe login
```

已完成 已在 IzumiSagiri 登录

❷ 将事件转发到您的 Webhook

```
$ stripe listen --forward-to localhost:4242/webhook.php
```

❸ 用 CLI 触发事件

```
$ stripe trigger payment_intent.succeeded ∨
```

完成

```php
12    //    php -S localhost:4242
13
14    require 'vendor/autoload.php';
15
16    // The library needs to be configured with your account's secret key.
17    // Ensure the key is kept out of any version control system you might be using.
18    $stripe = new \Stripe\StripeClient('sk_test_...');
19
20    // This is your Stripe CLI webhook secret for testing your endpoint locally.
21    $endpoint_secret = 'whsec_33b579dd017ef633e7d069deecc22d1fdd483497dfd5ca9cb43bcef8e5ff37e0';
22
23    $payload = @file_get_contents('php://input');
24    $sig_header = $_SERVER['HTTP_STRIPE_SIGNATURE'];
25    $event = null;
26
27    try {
28        $event = \Stripe\Webhook::constructEvent(
29            $payload, $sig_header, $endpoint_secret
30        );
31    } catch(\UnexpectedValueException $e) {
32        // Invalid payload
33        http_response_code(400);
34        exit();
35    } catch(\Stripe\Exception\SignatureVerificationException $e) {
36        // Invalid signature
37        http_response_code(400);
38        exit();
39    }
40
41    // Handle the event
42    switch ($event->type) {
43        case 'payment_intent.succeeded':
44            $paymentIntent = $event->data->object;
45        // ... handle other event types
46        default:
47            echo 'Received unknown event type ' . $event->type;
48    }
49
50    http_response_code(200);
```

📋 复制

Follow the command by using CMD

For the second step change to your own localhost

After done step two open a new CMD copy paste the last command and click 完成

🖥 IzumiSagiri   http://localhost/Ventify-main/Ventify/payment.php   1.19.4   正在侦听
